

## CUMULATIVE INDEX: VOLUME 5

## SUBJECT INDEX

- Abdominal mass, false, 13  
 Abdominal strengthening exercises and FHR, 160  
 Abortion, diabetes, 368  
 Abortion, mechanism, diabetes, 370-372  
 Abruptio placentae, and cocaine, 142, 206, 207  
 Acceleration, developmental, 260  
 Acid-base balance fetal, 177-184  
 Acidosis, fetal, monitoring, 177-184  
 Acid phosphatase activity, vernix caseosa, 257-258  
 Acrocallosal syndrome, and ACC, 105  
 Acyclovir, use in varicella pneumonia, 16-17  
 Advanced maternal age, and pregnancy loss, 3-4  
 Agenesis  
   corpus callosum, 105-108  
     diagnosis, 226  
     prognosis, 107, 231  
   pulmonary, 304-305  
 Aicardi syndrome, and ACC, 105  
 Alkali therapy, 87  
 Alloxan model, 317  
 American Academy of Pediatrics, Perinatal Pediatrics Program, 378  
 Amino acids, effect of lipid infusions, 201-205  
 Amniocentesis, screening for infection, 64  
 Amnionitis, PROM, 263  
 Amniotic band syndrome, sonographic diagnosis, 5  
 Amniotic cavity infection, tocolysis, 300  
 Amniotic fluid, fibronectin content, 26  
 Amniotic fluid particulate, 252  
 Amphotericin B, neonatal fungal colonization, 34  
 Ampicillin, *Listeria monocytogenes* therapy, 287  
 Andermann syndrome, and ACC, 105  
 Anemia of prematurity, transfusions, 40  
 Anencephalus, and amniotic band, 5-6  
 Angiotensin II, preeclampsia, 223, 224, 225  
 Antepartum fetal heart rate, monitoring, evaluation, 134-140  
 Antibacterial activity, deficient, amniotic, 26  
 Antibiotics, in CSF shunt patients, pregnancy, 22  
 Antihypertensive drugs, effect on placental COMT activity, 122-126  
 Anti-PL<sup>A1</sup> antibodies, 80-81  
 Antithyroid drugs, and neonatal thyroid, 154-158  
 Apgar score  
   indicator of asphyxia, 85  
   prediction of low, 118  
   relation to asphyxia and acidosis, 186  
 Apnea, measurement, 172-174  
 Aqueductal stenosis, and ACC, 105  
 Arachidonic acid, effect on prostaglandin production, 222, 223  
 Arachidonic acid diminution, preeclampsia with IUGR, 223, 225  
 Arachnoid cysts, and ACC, 105  
 Arnold-Chiari type II malformations and ACC, 105  
 Ascites, chylous, 61, 63  
 Asphyxia  
   and glycemic control, 337  
   and increased E<sub>3</sub>, 332  
   and perinatal mortality, 119  
 Atherosclerosis, risk of premature, 10  
 Athletics, pregnancy, 94-97  
 Atresia, gastrointestinal, inheritance, 294  
 Auditory brainstem responses, sleep apnea, 172  
 Autonomic nervous system, fetal maturation, 260  
 Bacterial colonization of amniotic cavity, 64  
 Bayes' theorem, in gestational age prediction, 44, 45, 47-48  
 Beat-to-beat variability, effect of meperidine, 199, 200  
 Beta-adrenergic receptor stimulation, 283  
 Beta-cell hypoplasia, 336  
 Beta-hydroxybutyrate, mouse embryo, 320, 323  
 Beta-hydroxybutyrate infusion, ewes, 313  
 Beta-thromboglobulin measurement, 109-111  
 Biparietal diameter, fetal, gestational age parameter, 45-48  
 Birth asphyxia, and Apgar scores, 85, 87  
 Birth out of wedlock, 278-281  
 Birthweight, low, relation to parity, 101-103  
 Blood glucose status, transport, very-low-birthweight infants, 75  
 Blood pressure status, transport, very-low-birthweight infants, 75  
 Blood sampling, fetal umbilical cord, indications, 264  
 Bone mineralization  
   fetal, and glycemic control, 335  
   rat model, 339  
 Brain abscess, citrobacter, 37

- Brainstem auditory nuclei, 172  
Breech presentation, management, 247-250
- Calcification placental and fetal weight ratio, 20  
Calcifications, intraluminal gastrointestinal atresias, 293-294  
Calcium, maternal serum, 210  
Calcium availability, diabetic pregnancy, 335  
*Candida*, in very-low-birthweight infants, 34, 35  
Capillary blood glucose, 340  
Carbohydrate metabolism, maternal, 145  
Cardiac catheterization, IDM, 355  
Cardiac enlargement, infants of diabetic mothers, 353-357  
Cardiac failure, infants of diabetic mothers, mechanisms, 355-356  
Cardiac motion fetal, wastage after, 1  
Cardiomegaly, in Uhl's anomaly, 164-167  
Cardiomyopathy, and diabetes control, 356  
Cardiotocogram, fetal, and hypoxia and acidosis, 177-184  
Carotid sinus massage, PSVT, 128, 129  
Catecholamines, function in pregnancy, 121  
Catecholamines, induction of glucose production, 351  
Catecholesterol, 126  
Catechol-O-methyltransferase (COMT) activity, measurement, placental, 121-126  
Caudal regression syndrome, diabetic pregnancy, 371  
Central nervous system anomalies, agenesis of corpus callosum, 105  
Cerebral abscesses, infant, 38  
Cerebral abscesses, sonography in diagnosis, 39  
Cerebral palsy, breech, 292  
Cerebrospinal fluid shunt, malfunction in pregnancy, 23  
Cerebrospinal fluid shunts, pregnancy in patients, 22-24  
Cervical incompetence, and amniotic band syndrome, 7  
Cervicitis  
  diagnostic criteria, 242-245  
  photographic diagnosis, 243  
Cesarean indications, breech, 289, 291-292  
Cesarean section  
  breech presentation, 247-248, 249  
  preparation in CSF shunt patients, 22  
Chicken pox, pregnancy, 17  
*Chlamydia trachomatis*, adverse perinatal events, 242  
Chorioamnionitis  
  criteria for LEA diagnosis, 65  
  tocolysis failure, 300-302  
Chorioangioma, 63  
Chorionic gonadotropin, beta-subunit, 369  
Chorion villi sampling, induction of abortion, risk, 1-2  
Chronic fetal distress, 307  
Chylous ascites, 61, 63  
Cincinnati Study, bone mineralization, 340  
circulation, fetal, access, 264  
*Citrobacter diversus* infection, 37  
Cloverleaf skull, 239-240  
  sonographic findings, 240  
coagulation, pregnancy, 70  
coagulation cascade, soluble components, hypercoagulability of pregnancy, 109  
cocaine, prevalence of use during pregnancy, 206-207  
Cocaine use, pregnancy, maternal risk, 142-143  
collagen synthesis, and insulin, 342  
colonization, amniotic fluid, 302  
colonization, fungal, very-low-birthweight infants, 34  
colpocephaly, ACC, 230, 231  
complicated pregnancy, diabetes, Cincinnati, 331  
Computed tomography, in *C. diversus* meningitis, 37-39  
Conception, teratogenic influences, diabetes, 334-335  
Congenital anomalies, false, 13  
Congenital anomalies, and fetal heart rate abnormalities, 135-136  
Congenital malformations, glycemic control and, 335  
Congestive heart failure  
  IDM, treatment, 356  
  infants of diabetic mothers, 353  
  neonatal, 98-100  
Cordocentesis, 264-266  
Coronary artery disease, diabetic pregnancy, 365  
Corpus callosum  
  agenesis, diagnostic criteria, 226-231  
  function, 105  
C-peptide excretion, urinary, 144-145  
Crack, 142  
Creatinine, nephropathy, 364  
Cyclic adenosine monophosphate, role in SAP-35 expression, 376  
Cystic hygroma false, 13  
Cytosolic enzyme, 121  
Dandy-Walker cysts, and ACC, 105  
Decelerations, late, hypoxia, 276  
Delivery complications, unwed mothers, 280  
Delivery management, diabetic pregnancy, Cincinnati, 328-329  
Delivery method, breech, low birthweight, 289-292  
Demographic data, relation to pregnancy loss, 2  
Depression, neonatal, 85-87  
Developmental course, FHR parameters, 273-274  
Developmental disability, and low birthweight, 214  
Developmental disorders, classification, 215  
Dexamethasone  
  inhibition of SAP 35, 376  
  thrombocytopenia, 79  
Diabetes  
  cause of congenital defects, 319-325  
  control of, 309  
  neonatal hypocalcemia, 339-342  
  poor control, 319  
  poorly controlled, synergistic effect of serum factors, 324  
  pregnancy, H. Knowles, 310  
Diabetes mellitus  
  catecholamines in, 121  
Diabetic complications, 359-366  
Diabetic pregnancy  
  Cincinnati study, 328  
  patient management, Cincinnati, 328  
Diatrizoate meglumine enema, and NEC, 133  
Digitalis, 129, 356  
Dihydroalprenolol, 283-285  
Dye, fetal exposure, 234  
Dysmaturity, 307  
Echocardiography  
  IDM cardiomyopathy, 354-355  
  M-mode diagnosis of fetal anomaly, 164-167  
Echovirus 7, neonatal infection, 236-238  
Electroencephalogram, fetal, and hypoxia and acidosis, 177-184  
Embryopathy, diabetic, 319  
Encephalocele  
  and ACC, 105  
  and amniotic band, 5-6  
Encephalography, fetal, evaluation, 177-184  
Endometritis, 65  
Endotracheal intubation, varicella pneumonia, 17  
Enteroviral illness, perinatal transmission, 238  
Epidermal growth factor, role in SAP-35 expression, 376  
Epidural anesthesia, verapamil during, 128-130  
Estril, measurement, diabetes, 327-333  
Estrogen, effect on fetal rabbit lung, 283

- Evan's blue dye, fetal exposure, 234-235
- Exchange transfusion, immune-mediated thrombocytopenia, 79
- Exercise, pregnancy, 94-97
- External cephalic version, breech presentation, 248, 249, 250
- Extra-abdominal mass, false, 13
- Eye disease, diabetic, 361-363
- Factor VIII abnormalities, preeclampsia, 29, 31-32
- Fat emulsion infusion, 9
- Femur length, gestational age predictor, 48
- Ferritin, serum, premature infants, Hebrew University study, 41-42
- Fetal beta-hydroxybutyrate, sheep, 313, 315
- Fetal bone mineralization, glycemic control, 335
- Fetal cardiac activity, sonographic confirmation, 2
- Fetal circulation access, 264
- Fetal distress, and catecholamines, 121
- Fetal glucose, sources, 344-349
- Fetal glucose kinetics, 346
- Fetal growth rates, ultrasound studies, 19
- Fetal heart rate  
accelerations, physiologic aspects, 275-276  
effect of meperidine, 199  
monitoring, breech presentation, 249  
monitoring, protocol, 134-135  
patterns, 272-276  
sinusoidal, 295-296  
response to exercise, 159-163  
variability  
and congenital anomalies, 98-100  
effect of magnesium sulfate, 208-213
- Fetal hematologic indices, 265-266
- Fetal loss, ketoacidosis, 312
- Fetal oxygenation, diabetes, 317
- Fetal percutaneous umbilical cord blood sampling, 264-266
- Fetal size and growth relation to placental grade, 19-20
- Fetal surveillance, diabetic pregnancy, Cincinnati, 328
- Fetoscopy, 264
- Fibrinopeptide A, measurement, pregnancy, 70-72
- Fibronectin, biological properties, 26
- Fischer score, 273
- 5-fluorocytosine, 34
- Focal neuromuscular disorders, peri- or intraventricular hemorrhage, 215-216
- Free fatty acid, concentrations, effect of lipid infusions, 202, 204
- Frontothmoidal meningoencephalocele, etiology, 52
- Fructose, fetal sheep, 344
- Fundus photography, 361, 362
- Fungal infection, acquisition in neonate, 33
- Fungal protection, very-low-birthweight infants, 34-35
- Gasping, plug formation, 252
- Gastrointestinal atresias, 293-294
- Gastrointestinal perforation, neonatal, incidence, 131
- Gastroschisis, and amniotic band, 5-6
- Gastroschisis, diagnosis, 295-296
- Gel-exclusion chromatography, fibrinopeptide A, 70
- Gentamicin, *Listeria monocytogenes*, meningitis, 287
- Gestational age, estimating, 44-49
- Gestational diabetes, diagnosis, 168-170
- Glucoregulatory hormones, 351
- Glucose concentrations, effect of altered, 321-322
- Glucose control, Cincinnati study, 328-333
- Glucose disposal, sheep, 349-351
- Glucose homeostasis, effect of lipid infusions, 201-205
- Glucose metabolism, sheep model, 344-351
- Glucose tolerance test, evaluation, 168-170
- Glycemic control, and abortion, 370
- Glycemic control, labor, 337
- Glycemic control, temporal, 334-337
- Glycemic response, lipid infusions, 201-205
- Glycosylated hemoglobin, and bone mineral, 341, 342
- Glycosylated hemoglobin, first trimester, 319
- Glycosylation, nonenzymatic, 320-321
- Gonorrhea, 242
- Gram stain  
diagnosis of intra-amniotic infections, 64, 68  
role in amniocentesis screening for intra-amniotic infection, 64
- Graves' disease, 153
- Growth factor, insulin, 144-145
- Growth retardation, intrauterine, catecholamines in, 121
- Gunshot wound, gravid uterus, 232-233
- Hematocrit, prematurity, 40
- Hematologic indices, fetal, 265-266
- Hemodynamic effects of exercise, pregnancy, 94-97
- Hemoglobinopathies, 264
- Hemorrhage, periventricular or intraventricular, developmental consequences, 214
- Hepatic glycogen, sheep, 346
- Herpes simplex virus, 242
- Hormonal regulation, fetal glucose, 351
- Hyaline membrane disease, diabetes, 374-376
- Hydralazine, effect on placental COMT activity, 122, 123
- Hydramnios, delivery, 51
- Hydrolytic enzymes, epidermis, 257
- Hydrops fetalis, 62-63
- Hypercoagulable state, pregnancy, 70
- Hyperglycemia  
pregnancy, 312, 315  
teratogenicity, 322-323
- Hyperinsulinemia, and cardiac hypertrophy, 354
- Hyperketonemia, ewe, 313, 314
- Hyperlipidemia, simplified monitoring, 10-11
- Hyperthyrotropinemia, neonatal transient, 153
- Hypocalcemia, neonatal, 339-342
- Hypoglycemia  
diabetic, effect of pregnancy, 360  
neonatal, and glycemic control, 336-337  
teratogenicity, 325
- Hypomagnesemia, cause of fetal, 339
- Hypothyroidism, neonatal, transient, 153
- Hypoxia  
fetal, monitoring, 177-184  
and late decelerations, 276
- Hysterotomy, indications, 233
- Iatrogenic prematurity, 332-333
- Ileostomy, gastrointestinal atresias, 293
- Immune-mediated thrombocytopenia, IV gammaglobulin therapy, 79-82
- Immune thrombocytopenic purpura, BTG concentration, 111
- Immunoassay, platelet-specific proteins, 109
- Infant management, diabetic pregnancy, Cincinnati, 329
- Infants of diabetic mothers, cardiac failure, mechanisms, 355-356
- Inflammation, relation to neonatal death, 300

- Inhibition of prostaglandin catabolism, human milk, 89
- Insulin, effect on bone mineral content, 342
- Insulin deficiency, and bone mineral content, 339
- Insulin-dependent women, pregnancy risk, 327
- Insulin production, measurement, 144
- Insulin receptors, placental, 345
- Intensive insulin therapy, retinopathy progression, 363-364
- Intermamillary indices, 54-55
- Interventricular septum, hypertrophy, 353, 354
- Intra-amniotic infection, diagnosis, 64-68
- Intracranial aneurysm maternal, 142-143
- Intrauterine growth retardation (IUGR)  
differentiation, small for gestational age, 307  
risk factors, 267  
and SGOT elevation, 147-150  
unwed mothers, 281
- Intraventricular hemorrhage  
breech, 290, 292  
developmental consequences, 214-219
- Iron accumulation, fetal, 40
- Iron supplements, premature infants, 40-43
- Ischemic bowel syndrome, 133
- Israel, unwed mothers, 278-279, 281
- Keratinocytes, passage, 258
- Ketoacidosis  
effect of pregnancy, 360  
fetal loss rate, 312
- Ketone bodies, teratogenicity, 323
- Ketones, placental crossing, 317
- Kinetics, fetal glucose, 344, 345
- Knowles, Harvey, 309-311
- Kubli score, 273, 276
- Labor assessment instruments, 118
- Labor management, diabetic pregnancy, Cincinnati, 328-329
- Labor risk assessment, 113-119
- Lamellar granules, epidermal, 257
- Lanugo hairs, 253, 254
- Late decelerations, and hypoxia, 276
- Leukocyte esterase test, in intraamniotic diagnosis, 64-68
- Lipid infusions, effect on glucose homeostasis, 201-205
- Lipids  
increased, after fat emulsions, 8-11  
vernix caseosa, 253  
in very-low-birthweight neonates, 8
- Lipomas, midline, and ACC, 105
- Lipoprotein lipase in very-low-birthweight neonates, 10
- Listeria monocytogenes*  
chorioamnionitis, 286-287
- Listeriosis, perinatal, 286-287
- Liver dysfunction, in pregnancy-induced hypertension, 146-150
- Liver involvement, toxemia of pregnancy, 146-150
- Low birthweight  
breech delivery method, 289-292  
relation to maternal age, 101-103
- Lung agenesis, 304-305
- Lung membrane, BAR sites, 284-285
- Macrosomia  
and glycemic control, 336  
pathophysiologic mechanisms, 353-354  
and plasma glucose, 170
- Macular edema, diabetes, 363
- Magnesium, maternal serum, relationship to FHR variability, 210-211
- Magnesium deficiency, and abortion, 370, 371-372
- Magnesium status, diabetic pregnancy, 335
- Magnesium therapy  
preeclampsia, 209  
safety, 213
- Magnesium toxicity, 212-213
- Malformation rate, diabetes in pregnancy, 310-311, 319
- Maternal age, relation to birthweight, 101-103
- Meconium, particulate, 251
- Meningitis, *C. diversus*, 37-39
- Meningoencephalocele, resection, 51
- Mental developmental delays, and peri- or intraventricular hemorrhage, 216, 219
- Meperidine  
effect on fetal activity, 197-200  
uterine activity, 306
- Meroanencephaly, undiagnosed, 13-14
- Metabolic control, first trimester, diabetes, 335
- Metanephrine, 121
- Methimazole, effect on neonatal thyroid, 154-155, 156
- Methyldopa, effect on placental COMT activity, 122, 123
- Microcephalies, and ACC, 105
- Microvascular diabetic complications, 359-366
- Monoamine oxidase activity, placental, 126
- Multiparity, relation to birthweight, 101-103
- Mycoplasmas, genital, 242
- Myocardial changes, infants of diabetic mothers, 354
- Myofibrils, cardiac hyperplasia, 354
- Neonatal citrobacter meningitis, complications, 39
- Neonatal complications, unwed mothers, 280-281
- Neonatal necrotizing enterocolitis, 132-133
- Neonatal outcome categories, predictability, 117-118
- Neonatal sepsis, criteria for LEA diagnosis, 65
- Neonatal transfontellar ultrasound, diagnosis of ACC, 231
- Nephropathy, diabetic, 364-365, 366
- Nerve cell bioelectric potentials, 177
- Neurobehavioral impairment, magnesium related, 213
- Neurologic dysfunction, low birthweight breech, 290
- Neurologic maturation, effects of stress, 260
- Neuromuscular function, disturbed, and peri- or intraventricular hemorrhage, 216
- Nipples, widely spaced, in birth defects, 54
- Nontest tests (NST) reactive, PROM, 262, 263
- Nonteratogenic serum factors, 324
- Norepinephrine  
placental, 126  
preeclampsia, 223, 224, 225
- Nuchal bleb, 14, 15
- Nystatin, prophylactic in very-low-birthweight infants, 33-35
- Obstetric complications, and neonatal gastrointestinal perforations, 131
- Oligohydramnios  
iatrogenic injury, 235  
tracheal plug, 251-252
- Omphalocele, and amniotic band, 5-6
- Operating room sonography, 297
- Osteopenia, diabetic, 342
- Out of wedlock, birthweight, 278
- Oxygenation, fetal, diabetes, 317
- Parity, relation to birthweight, 101-103
- Paroxysmal supra ventricular tachycardia (PSVT), 128-130
- Patent ductus arteriosus, and pregnancy-induced hypertension, 148
- Patient management, diabetic pregnancy Cincinnati, 328
- Periconceptional glycemic control, 334-335

- Perinatal mortality of morbidity, fetal heart rate tested population, 137-139
- Perinatal outcome, predicting, 272-276
- Perinatal risk assessment, utility, 113
- Perinatal sepsis, *Listeria monocytogenes*, 286-287
- Periventricular hemorrhage developmental consequences, 214-219
- PGDH, effects of human milk on, 89-93
- Phenylephrine, 129
- Phospholipid release, beta-adrenergic stimulation, 283
- Photocoagulation, diabetic retinopathy, 362, 363
- pH status, transport very-low-birthweight infants, 75
- Physiologic aspects, FHR accelerations, 275-276
- Placental glucose transfer, sheep, 345
- Platelet activation, pathogenesis, obstetrical conditions, 109
- Platelet factor, 4 measurement, 109
- Platelet lifespan measurement, pregnancy, 109
- Pneumograms, 172-176
- Pneumonia, varicella, 16-17
- pO<sub>2</sub> status, transport, very-low-birthweight infants, 75
- Polyhydramnios diabetic pregnancy, 336 resolving, 61-63
- Porencephalic cysts, and ACC, 105
- Predictor of perinatal outcome FHR, 272-276
- Preeclampsia diabetic nephropathy, 364-365 diabetic pregnancy, 335-336 and fetal heart rate, 208 hematologic and coagulation abnormalities, 29 liver involvement, 149 magnesium therapy, 209
- Pregnancy in cerebrospinal fluid shunt patients, 22-24 dating, 44
- Pregnancy complications, unwed mothers, 280
- Pregnancy-induced hypertension, 146-150
- Pregnancy risks, insulin-dependent women, 327
- Pregnancy termination, 23 weeks gestation, 5
- Preimplantation wastage, incidence, 1
- Premature rupture of membranes (PROM) and fetal heart rate, 260-263 FHR accelerations, 262 and infectious morbidity, 64 role of amniotic fluid FN concentrations, 26-28
- Prematurity, iatrogenic, 332-333
- Proliferative retinopathy, 363
- Propranolol, PSVT, 129
- Propylthiouracil, effect on neonatal thyroid, 154-155
- Prostacyclin, preeclampsia, 220
- Prostaglandin catabolism, inhibition in human milk, 89-93
- Prostaglandin concentrations, milk, 89
- Prostaglandin precursor, decreased availability, preeclampsia, 225
- Prostaglandin production, preeclampsia, 220
- Prostaglandins, milk, influence on gastrointestinal physiology, 89, 92
- Prostanoids, umbilical artery production, 221-222
- Protein glycosylation, 320-321
- Proteinuria, 364
- Prune belly, associated with cloverleaf skull, 239-240
- Psychomotor disturbances, agenesis, corpus callosum, 105
- Puerperal endometritis, criteria for LEA diagnosis, 65
- Pulmonary agenesis, 304-305
- Pulmonary development, relation to sex steroids, 285
- Pulmonary maturation, effect of stress, 260
- Respiratory distress syndrome, diagnosis, breech, 290, 292
- Resuscitation, neonatal, criteria, 87
- Resuscitation teams, 119
- Retinopathy, effect of pregnancy, 361-363
- Rh immunoglobulin prophylaxis, 57
- Rh negativity, unexpected results, 57-60
- Risk-scoring system, perinatal, 113
- Rubenstein-Taybi syndrome, and ACC, 105
- Safe site, uterine incision, 299
- SAP-35, 375-376
- Second trimester glycemic control, 335-336
